Mr. Dennis Baker
Facilities Manager
Varian Solid State Microwave Division
3251 Olcott Street
Santa Clara, CA 95054

Dear Mr. Baker:

EPA ID #CAT000625392

The Department of Health Services (DHS) has received and reviewed your letter dated November 9, 1987 which responded to the Report of Violations (ROV) issued to Varian Solid State Microwave Division on October 5, 1987. Following are the Department's comments on the document received. The status of each violation identified in the ROV is included. The original order and numbering of each violation is retained for ease of reference.

VIOLATIONS:

- 1, 2 and 3. These violations have been corrected.
4. As stated in the ROV, the closure plan must include an estimate of the expected year of closure.
- 5 and 6. The document submitted as Attachment A did not include the names of employees on the emergency response team. A modified portion of the training plan showing the names of all hazardous waste personnel and the amount of both introductory and continuing training (i.e., CPR, Fire Extinguisher, Spill Control, etc.) given to each position must be sent to DHS.
- 6a. The list of emergency coordinators must include addresses as required in the ROV.
- 6b, 7, 8, 9, 10, 11 and 12. These violations have been corrected.

Upon receipt of this letter, Varian must correct all deficiencies noted above and submit the required documents within seven working days to DHS.
